I think it would be helpful to hear a summary of the lead levels being observed in the residential areas around Exide and any patterns. I believe that they prioritize cleanup based on highest sample result, although each lot has a larger data set. I'm not sure how they are using the entire data set and what evaluations they may have done with the data as a whole. Similarly, do they have a summary of blood lead levels measured?

What I have so far for the agenda. Send me any suggested changes. Dan

Draft Agenda

USEPA/CalEPA/DTSC

March 1, 2016

1000 to 1500 hours

Argonaut Mine – 1000 to 1200

- Schedule for EMAD Design and Construction (DTSC)
- Status of funding for EMAD Design and Retrofit (DTSC)
- Update on geotechnical and Lidar survey work (EPA)

Exide Technologies – 1300 to 1500

- Overviews of the closure plan and the outside the fence-line cleanup plan (DTSC)
- How DTSC is prioritizing among the residential parcels that require clean up (DTSC)
- Interface with NEIC on lead speciation and enforcement (EPA)
- Using GIS tools to manage the data (All)
- Status of closure/clean up funding (DTSC)

- Brownfields job training centers as a resource for during the Exide clean up (All)

Subject: Draft Agendas for Meeting on March 1 in Sacramento

Hi Ray and Charlie

I wanted to check in with you guys on agenda topics for our meeting next week on Exide and Argonaut. We are scheduled to meet on Argonaut in the morning, 10-noon and on Exide in the afternoon, 1300-1500.

We can meet at Cal/EPA on I Street or at DTSC's office in Cal Center, whichever you prefer.

For agenda topics, these are the areas we would like to cover:

Exide

Overviews of the closure plan and the outside the fence-line cleanup plan (DTSC)

How DTSC is prioritizing among the residential parcels that require clean up (DTSC)

Interface with NEIC on lead speciation and enforcement (EPA)

Using GIS tools to manage the data (All)

Status of closure/clean up funding (DTSC)

Brownfields job training centers as a resource for Vernon community members (All)

Argonaut Mine

Schedule for Design and Construction (DTSC)

Status of funding for Design and Retrofit (DTSC)

Status of geotechnical and Lidar survey work (EPA)

We expect to have myself, Enrique Manzanilla, John Lyons, Deldi Reyes at the Exide meeting, with Tom Huettelman joining by phone. For the Argonaut meeting it will probably be myself, John Lyons and Enrique.

Let me know where you would like to meet. We'd like to have a conference line tie in available so Tom Huettelman can join.

Best, Dan M
